

How many labels per cartridge can I print? Six example graphics of various sizes. (LX Printers)

Below are sample graphics with a table below each showing the number of labels printed from each cartridge for various popular label sizes. These values apply to LX500e / LX900e. The graphics represent a range of 40% to 95% ink coverage. You'll notice that ink consumption will vary greatly depending on the coverage percentage and the colors used. As you can see a smartly designed label such as the Coffee, Sunscreen or Wine label can use very little ink *and* look great.

High Quality

4x2 = 306
4x3* = 208
4x4 = 158
5x4 = 127
6x4 = 106

Medium Quality

4x2 = 404
4x3* = 274
4x4 = 208
5x4 = 167
6x4 = 141

High Quality

4x2 = 218
4x3* = 147
4x4 = 111
5x4 = 90
6x4 = 75

Medium Quality

4x2 = 361
4x3* = 245
4x4 = 185
5x4 = 150
6x4 = 126

Notes: *Indicates native aspect ratio for this image. Other sizes were achieved by stretching or shrinking the aspect ratio in the NiceLabel software. All labels printed with Color Cartridge only. Labels with large areas of black graphic or text can be set to use the black cartridge if using an LX900e.

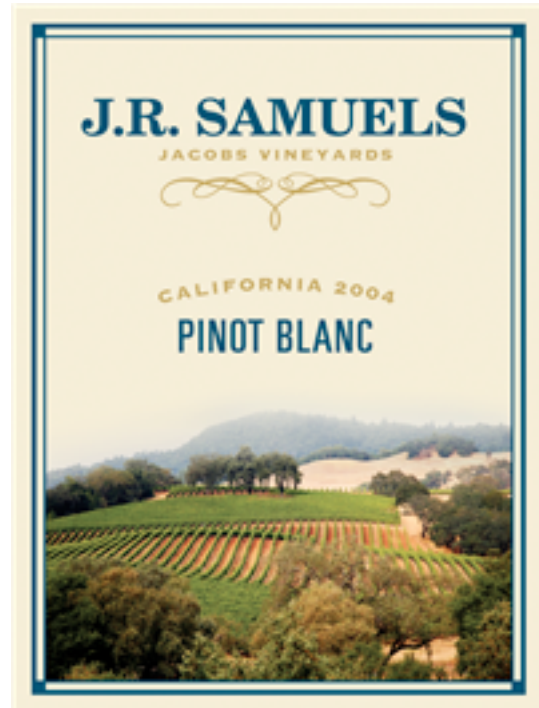

High Quality

2x4 = 444
 3x4* = 308
 4x4 = 235
 4x5 = 189
 4x6 = 158

Medium Quality

2x4 = 808
 3x4* = 564
 4x4 = 433
 4x5 = 352
 4x6 = 296
