

## All-in-One Rewind and Unwind Label Rolls!

The new LX-Rewinder spares you the trouble of self-rewinding printed labels on label cores and is therefore effectively time-saving. The LX-Unwinder enables the use of label rolls with a larger or smaller core diameter than the normal used 5,08 cm cores. By using LX-Unwinder and/or LX-Rewinder the label production is simplified and the amount of printed labels can be increased.

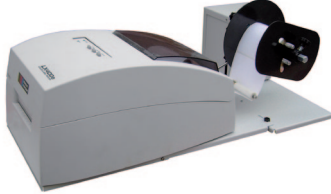

## Smooth Production Process

As soon as you connect the Rewinder and/or Unwinder to a printer, a great amount of labels can be produced smoothly and continually. An acoustic signal informs the user that the rewinding process has stopped and a new one can be started.

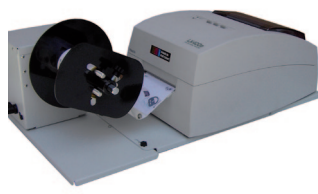

## Unwinder and Rewinder for LX200e and LX400e

### Combinations:

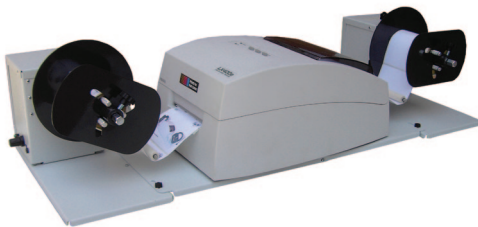

Unwind third party label stock with the *Unwinder*

Rewind up your labels with the *Rewinder*

Combine them both – *Rewinder* and *Unwinder* in combination
